                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Matches
                                                                                                                                                NUCIFORA G., Chu L., SILVER S., MISRA T.K.;

"MERCURY OPERON regulation by the merr gene of the organomercurial resistance system of plasmid pDU1358.";

J. Bacteriol. 171:4241-4247 (1989).

-I- FUNCTION: MEDIATES THE MERCURIC-DEPENDENT INDUCTION OF MERCURY RESISTANCE OPERON. IN THE ABSENCE OF MERCURY MERR REPRESSES TRANSCRIPTION BY BINDING TIGHTLY TO THE MER OPERATOR REGION; WHEN MERCURY IS PRESENT THE DIMERIC COMPLEX BINDS A SINGLE ION AND BECOMES A POTENT TRANSCRIPTIONAL ACTIVATOR, WHILE REMAINING
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          PL311;

Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
